

RAMPART

RECAP OF PREVIOUS QUARTER

This quarters training consisted of a Certified Alarm Technician 1 class and Day of CEU's in October, and a Fire Alarm Installation Methods class and International Building Code class in December. On September 16th we hosted our Annual Golf event in Windsor WI and on November 11th was the General Member meeting and Meet Your Vendor event.

UPCOMING EVENTS

The Annual Holiday party will take place January 20th in Pewaukee WI. March will hold the General Member meeting and a Day of CEU's.

WELCOME NEW MEMBERS

- Bolide Technology Group
- Nortek Control
- USA Central Station

ALARM MONITORING

WHY OUR DEALERS REMAIN FOR DECADES

- + **Exceptional service as a result of rigorous training**
- + **No specialists or transferred calls after pick up**
Fire, security, video, PERS and more
- + **Dedicated data entry and onboarding teams**
- + **Innovation leader of central station technologies**
UL-approved, proprietary software
In-house team can develop custom solutions
- + **Industry-leading AHJ and PSAP reporting capabilities**
Jurisdiction fire-signal management
- + **Simple account transfers from other central stations**
Six months of free service
We support all technologies and receiver formats
- + **We will never compete with you for customers**
That is one of our founding principles

DEDE SWIHART
Director of Operations
with EM24 since 1984

Founded in 1967, Emergency24 is a family-owned, UL-listed central station company with monitoring centers in Illinois, Wisconsin, Maryland and California.

**To learn more about Emergency24 and how we can help
your company gain a market advantage for decades to come, call**

1-800-800-3624 or email sales@emergency24.com.

Dec 15 Board Meeting
To Be Announced

WISA News

ANNUAL AWARDS CEREMONY & GOLF OUTING

Each year WISA holds an Award Ceremony honoring individuals in the industry that have been nominated by their bosses, peers, and other professionals. Be sure to nominate someone today for the 2022 awards being held on May 19th. Nominations are now being taken through April 15th. Don't delay, recognize someone today! Additional information can be found on our website under the about section. In conjunction with the award meeting, WISA held our annual golf outing on September 16th. We had a great turnout and a beautiful day for some golf! A huge THANK YOU to all sponsors and attendees for golfing and being part of the awards ceremony. For a complete recap and list of our 2020 sponsors, visit our website @ [wiesa.org](https://www.wiesa.org)

MEET THE WISA 2021 AWARD WINNERS

Per Mar Security Named Member/Dealer of the Year

Per Mar was cited for its community service regarding the local donations they provide in the communities they serve. Per Mar awards academic scholarships to students, and in 2019-2020 gave out 21 awards of \$500 each to students for their college education. They actively support WISA board events through volunteerism of their employees. The company was recently ranked 22nd nationally by SDM magazine in terms of its customer base. Ken Nerison accepted the award for Per Mar.

Matt Bolton, Capitol Fire and Security, Receives Technician of the Year Award

WISA honored Matt Bolton of Capitol Fire and Security with the Technician of the Year Award. He was recognized for the stellar job he does during installations and service calls, quickly learning on the job and picking up new skills. Bolton has been at Capitol Fire and Security for four years.

DSC received the Associate Member of the Year Award

As many alarm dealers struggled through these unusual times, DSC stepped up and helped bring products, training and solutions to our Wisconsin dealers.

Michael Genal, Cornerstone Security, Receives the Rising Star Award

Michael Genal was chosen for this award for his involvement in the industry over the years. Genal followed his father into the security business, joined Cornerstone, and is getting involved in the community. Known as a talented troubleshooter and problem-solver, he has helped Cornerstone map out their future, brings entrepreneurial spirit to Cornerstone and the industry, helping both succeed.

Lonnie Miescke, H&S Protection, Honored for 40 Years in the Industry with the Career Achievement Award

H&S Protection's Lonnie Miescke was honored by WISA with a Career Achievement Award for her 40 years of superior customer service. Lonnie takes her people and property seriously and has displayed a consistent professional demeanor over the years in her approach to customers. She has built numerous friends and relationships with customers in her interactions. She was thanked for her professionalism and superb customer interaction skills over her 40 years in the security industry.

Sue Luterbach, Stanley Security, Salesperson of the Year

Don McInnes described Sue as passionate and knowledgeable about her job. "Susan is knowledgeable and well-liked. We all know you buy from people you trust - she's that person. It is a well-deserved award," McInnes said in introducing Luterbach.

Accepting the award, Luterbach said, "You have to love what you do. It's not a job for me. I'm proud of being in this industry."

A top producer in both residential and commercial sales for Stanley, Sue was recognized as a leader in the field.

Dan Schmocker, Wauwatosa Fire Department, Public Safety Member of the Year

McInnes called Schmocker a "proponent of training and getting the job done right. He confronts issues and deals with them head-on. What do you get? Solutions." He was cited for his work as an inspector and contractor, working in compliance with life safety codes. Schmocker attributed winning the award to qualities of care, responsibility, credibility and passion. "If you don't have the answer, don't be afraid to go find it," he advised the audience.

APD's Dobratz and H&S's Garritson Honored with WISA President's Award

The "one-two punch" of APD's Brandon Dobratz and H&S Protection's Steve Garritson got them to the award stand as co-winners of WISA's President Award. WISA President Bill Flesch spoke warmly of both individuals and their contributions to WISA, the industry and the state of Wisconsin.

Both spend a tremendous amount of time outside of WISA board meetings on issues related to the industry. They drive memberships, always on the lookout for new members. Calling them a great "tag team," Flesch thanked them for continually urging other companies in the industry to step up to the plate and bring something to the table for the good of the security industry in Wisconsin.

WISA YOUTH SCHOLARSHIP

HELP US SPREAD THE WORD

The Wisconsin Security Association is pleased to announce the availability of two college scholarships for graduating high school seniors whose parents are full-time, active members of a Wisconsin police or fire department. One \$1,500 Youth Scholarship will be awarded to a son/daughter of an active-duty police department member and one to a son/daughter of an active-duty fire department member. Since 2010 WIESA has awarded \$34,000 in scholarships.

Applications are now being accepted for the 2022 Youth Scholarship Program. All high schools, fire departments, and police departments in Wisconsin will be sent the Youth Scholarship application. Schools, along with fire and police departments, are encouraged to post the scholarship application form on their websites. The application form includes submission information and the rules and eligibility requirements. WISA's application deadline is Friday **March 4, 2022**. Applications must be sent on or before this deadline to be accepted.

For more information visit <https://www.wiesa.org/about/youth-scholarship-information/>

DAY OF CEU'S

Easy IP and Analytics from Digital Watchdog

Digital Watchdog's Jason West, Regional Sales Manager for the Central U.S., detailed the ease of IP use and analytics of their VMAX IP-Plus NVR. During his training presentation, he outlined product lines, technical issues and the knowledge base necessary when using the VMAX.

Focusing primarily on the 8-channel PoE (Power over Ethernet) NVR with four virtual channels, West called the IVA (Intelligent Video Analytics) from the system "easy to set up" in the camera. "You can adjust the customer's analytics remotely. It's great for dealers and integrators in the field," he said. The ability to remotely change settings on the fly is an important asset, as well as the fact that the system is expandable. For example, if seven cameras are set up, but the customer wants four more, even with only eight PoE ports, the system can be expanded to handle the extra cameras. "You can set up and configure the system in less than four minutes. It's user friendly and includes a startup wizard. There's no need for a technical background" to be able to set the system up, he explained to attendees. The system is less hackable and can be remotely reset.

Two IVA Versions Explained-West went on to explain some of the differences between Digital Watchdog's IVA and IVA+ versions. Both have analytics to reduce false alarms.

The basic IVA version includes the following features:

*Intrusion*Line crossing*Loitering - alerts can be set to open an extra register in a retail setting, for example, when too many people cluster around the cash registers*Counting line (people coming in and out)*Enter*Exit*Tamper

The IVA+ camera would not only include the above-mentioned bullets, but these additional features:

*Object removed -- (for example, a painting being stolen); West explained a case in which Sonic fast food restaurants placed cameras on top of their facilities to focus on their HVAC systems to to focus on the theft of copper wire*Tailgating*Direction*Stopped - if someone stays in a detection zone too long; in these cases, a "duration time" can be set to capture the images*Appear - tracking people without crossing the line as they head into a zone*Abandoned - something being left behind like a bag at an airport or a backpack at a school

West's two sessions included installation instructions for easy IP with the VMAX and installing video management software, including camera discovery, recording schedule setup, creating rules using triggers such as analytics, user management, as well as the mobile app. Attendee received four continuing education credits for the two sessions.

Increase in the Demand for Touchless Biometric Technology

The sudden increase in demand for touchless biometric technology was covered by ZKTeco CEO Larry Reed to start the afternoon session October 28th as part of WISA's Day of CEU's. The increase in demand is bringing "biometrics into the mainstream," he said. Access control technologies and Covid have accelerated the adoption of biometrics. Why? Because touchless technologies are becoming more sought after due to "better hygiene" practices. "You don't have to touch the surfaces. This push is coming from customers," Reed explained. Some of the biometrics available include fingerprints, face, veins, irises. "Your biometrics can't be lost, stolen or forgotten. They are always on the person," Reed said as some of the advantages of the technology.

Access control can be managed from a smartphone or online computer. "It's easy and straightforward. The customer just has to figure out how to enroll in system" with whichever biometric they choose to use, he observed. Beyond the advantage of better hygiene, Reed explained that biometrics "improve security, are fast and convenient and eliminate privacy concerns."

Additionally:

- There are no ongoing replacement costs
- Biometrics can't be shared
- There are no accidental lockouts
- It's always available
- Biometrics can provide occupancy control

NVT Phybridge Expands on Digital Transmission Abilities

NVT Phybridge, represented by Senior Support Technician Nicolas Puello and Regional Sales Manager Lucas Spagnuolo, expanded on advantages of their company's digital transmission abilities from a WISA CEU presentation earlier in the year. At the CEU session October 28, they discussed additional innovative solutions for digital transformation in the networking world.

NVT Phybridge PoE (Power over Ethernet) innovations improve customers' digital transmission abilities by leveraging new or existing infrastructure with extended reach capabilities. Traditional LAN design for IP and IoT can experience higher costs, greater network complexity and cyber-security concerns.

Their presentation focused on extended reach, scalability and dependability of their solutions, particularly as facilities hosting older cabling types are avoiding moving over to an IoT enabled state because of the fear of the disruption and cost it would take to rip-and-replace cable to create a network backbone to support smart devices. By removing this barrier, NVT Phybridge's solutions look to improve their customers' digital outcomes through new transmission products.

Their solutions can help WISA members capture the market that is still "digital transformation" hesitant. With connected devices changing dramatically in the last 15 years due to the move from analog to digital, there are new challenges regarding power and connectivity.

One of the biggest challenges, is maintaining connectivity over increased distances. NVT's line of solutions give up to 6,000 feet of reach and connect to newer devices used in installations across different locations for a customer - sensors, phones, access control, intercom, video. "Surveillance or access control systems are simplified for customers. Whatever you plug us into, it will work," Spagnuolo said.

NVT Phybridge solutions are "fully North American made. That's good information to share with your customers," he added. Some clients using their technology include: NASA (National Aeronautics and Space Administration); Subaru; ESPN; J.P. Morgan and Macy's.

For information on upcoming WISA CEU classes, contact Nicole Szopinski at executive.director@wisa.org.

GENERAL MEMBER MEETING

WISA Vice President Tom Kenderish kicked off the ceremony by observing Veteran's day and recognizing new members to the association: Nortek, USA Central Station and Bolide Technologies. This coming May will be the end of the term for current board members, and the association is looking for new participants on the board. If you are interested in being part of the WISA Board and/or a committee member, please reach out to Nicole @ executive.director@wisa.org and she can answer any questions you may have.

Unique this year, WISA extended a special invitation to WISA associate members to join the general member meeting and set up a table to meet with Wisconsin companies. Thank you to the following associate members who attended.

Training

CERTIFIED ALARM TECH LEVEL 1 (CAT1)

Apr 6-8 VIRTUAL

8a-5p Wed-Fri

\$395 WISA Members

\$545 Non-Members

Up to 24 CEUs

Sign up online at <https://www.wiesa.org/event/certified-alarm-technician-level-i-april-6-8-2022/>

DESCRIPTION

The Core Technical Training and Certification Program for the Electronic Security Industry is considered so essential dozens of states and localities insist on it as a prerequisite for performing security integration work. The course is targeted to technicians, service personnel, installation personnel, sales staff and business owners to prepare to plan for and initiate a successful installation. An e-manual and proctored exam with a pre-approved testing facility is included in this purchase.(NTS 2.4 CEUs)

CERTIFIED ALARM TECHNICIAN LEVEL 1 WILL PROVIDE INDIVIDUALS WITH THE FOLLOWING KNOWLEDGE AND SKILLS TO:

- Plan for and initiate a successful installation, while being able to tailor it to commercial or residential applications
- Act responsibly and safely while on the job
- Communicate effectively with customers and others in the industry
- Understand the importance of codes and standards and how to locate and apply them
- Define basic installation procedures and compare the underlying technology behind the various security system tools and equipment
- A building block for more advanced and specialized training that can lead to enhanced profits and increased compensation for the student/credential holder

WHO SHOULD ATTEND

Technicians, service personnel, installation personnel, sales staff and business owners.

SUBJECT AREAS

- Fire alarm system induction
- Codes and standards
- Fire system fundamentals
- Initiating device operation
- Initiating device spacing and location
- Emergency control functions
- Communication and reporting
- Testing and inspecting
- Notification appliances and circuits
- Household systems
- Documentation
- Wiring
- CO detection
- Emerging technologies

FIRE ALARM INSTALLATION METHODS(FAIM)

May 11-12 VIRTUAL

8a-5p Wed-Thurs

\$395 WIESA Members
\$545 Non-Members

Up to 16 CEUs

Sign up online at <https://www.wiesa.org/event/fire-alarm-installation-methods-certification-may-11-12-2022/>

DESCRIPTION

This 14-hour course, provides broad training in proper installation and service requirements for commercial and household fire alarm systems based on NFPA and ICC codes. NFPA requires fire inspection and testing personnel to be knowledgeable and trained, and service personnel be qualified and experienced. Students will learn the information needed for professionals to become familiar with fire alarm system requirements necessary to gain certification and prove competence. An e-manual and proctored exam with a pre-approved testing facility is included in this purchase.

FIRE ALARM INSTALLATION METHODS WILL PROVIDE INDIVIDUALS WITH THE KNOWLEDGE AND SKILLS TO:

Install and maintain fire alarm systems that comply with NFPA 72, ICC, and NFPA 70

Properly service and maintain fire alarm systems

WHO SHOULD ATTEND

Individuals seeking fire certification, technical staff, sales personnel, business owners, fire service and code officials

SUBJECT AREAS

- Fire alarm system induction
- Codes and standards
- Fire system fundamentals
- Initiating device operation
- Initiating device spacing and location
- Emergency control functions
- Communication and reporting
- Testing and inspecting
- Notification appliances and circuits
- Household systems
- Documentation
- Wiring
- CO detection
- Emerging technologies

ASSOCIATE MEMBER SHOWCASE

All associate members are eligible to be highlighted in our bi-monthly WISA News email blasts. This opportunity has been well received and is a great benefit that you should take advantage of. Advertise any new products, discounts, special offers, etc that you have to offer for free! We will include a write up, contact information and a link to your website. Have you already been featured and you have a new product that you are excited about? Let us know and we will include it in our blasts. This is not a one time only chance! Contact Nicole @ executive.director@wiesa.org if you are interested.

EMAILS FROM WISA

Are you not receiving our bi-monthly email blasts or notice of upcoming events? Check your spam folder and/or add executive.director@wiesa.org to your contact/address book to make sure you are receiving these important emails.

Log into wiesa.org and click on the **Members Benefits section to receive up to a **25% discount** on training**

Managing Risk and Protecting YOUR Business

Electronic security and life safety installation and monitoring companies face significant risk each day: injury to workers, fleet accidents, property damage and lawsuits can all impact day-to-day operations and bottom lines.

Security America offers industry expertise, keeping companies like yours protected, with A-rated coverage on:

- | | |
|----------------------|-----------------------|
| General liability | Commercial auto/fleet |
| Errors and omissions | Workers compensation |
| Umbrella/excess | Cyber liability |

SecurityAmericaIns.com

The purpose of the Wisconsin Security Association is to promote the interest of the electronic protection and alarm system industry. The WISA informs the public of services performed by the industry.

It facilitates communication among those engaged in the sale and installation of alarm detection and supervisory systems by providing a forum for the discussion of ideas and problems.

The Wisconsin Security Association encourages the enactment of legislation beneficial to the electronic alarm system industry and the public interest. Of utmost importance to the Association is the promotion of professionalism.
